Below we describe the PCG and the PII, and activities that the Program carried out through either of the PCG or the PII or both.

Program on Corporate Governance

The Program on Corporate Governance (PCG) seeks to contribute to policy, public discourse, and education in the field of corporate governance. It seeks to advance this mission in two inter-related ways:

- *Bridging the gap between academia and practice:* The PCG seeks to foster interaction between the worlds of academia and practice that will enrich both. Such interaction enables academic researchers to better understand the issues and the environment facing practitioners, thereby facilitating research that will be more relevant for practice. Interaction between academia and practice also keeps public and private decision-makers better informed about research activities in corporate governance, and enhances the public discourse on corporate governance.

- *Fostering policy-relevant research:* The PCG fosters empirical and policy research that sheds light on corporate governance questions facing public and private decision-makers. By providing relevant research that is grounded in the best methods of academic research, such projects can have an important impact on decision-making and public discourse in the field.

The PCG’s director is Professor Lucian Bebchuk, and other Harvard Law School faculty members contributing to its activities during 2014-15 were Robert Clark, John Coates, Alma
