Checklist for Campus Visitors
(7 days or fewer)

Updated as of March 3, 2022

PRIOR TO VISITING CAMPUS

- In an effort to reduce the risk and spread of COVID-19, Harvard University asks that all visitors attest to or demonstrate proof of vaccination or recent negative COVID-19 test.

- You are encouraged to take a COVID-19 test within 24 hours of arrival, at your own expense. Please report your result to your host prior to coming to campus.

- Unvaccinated visitors traveling to Harvard from international points of departure should test again on day 4 or 5 (in addition to arrival date) and must avoid close, unmasked social activities, including social gatherings and dining with other unvaccinated people, until the arrival test has cleared.

- Self-assess your health; do not come to campus if you are ill or exhibiting symptoms, or if you have been exposed to COVID-19 or have tested positive for COVID-19 within 10 days prior to arrival.

- Coordinate with your HLS contact for building access.

*Please note, all HLS Campus Buildings require badge access for entry.

WHILE ON CAMPUS

- Wear a University-approved face covering whenever indoors.

- Follow good hygiene practices and any University or HLS-specific safety requirements. See Harvard’s COVID-19 Safety Awareness Training: Prevention/Protection Practices for more information.

- Assuming you have no COVID symptoms and no known exposure to an infected person, it is permissible to participate in in-person activities, following appropriate masking policies.

- Report a positive COVID-19 test result or clinician diagnosis immediately to HUHS via email at clear@huhs.harvard.edu if you have been on campus within 48 hours of symptom onset or positive test result.

For additional information, please visit our Return to Campus page or our Visitors page.
