Visitor Notification

Dear [Visitor name],

In accordance with Harvard University and HLS guidelines, and in confirmation of your upcoming visit to Harvard Law School (HLS), we write to inform you that the University mandates COVID-19 vaccination and booster shots for all University community members.

At HLS, we also expect that any visitors to our campus, by virtue of their decision to attend any of our on-campus events or activities, attest and agree as follows:

- I am fully vaccinated against COVID-19 using a vaccine authorized by the FDA or WHO and have received my booster (if eligible); or
- I qualify for exemption based upon age, a medical contraindication, or firmly held religious belief.

HLS guidelines also require that we:

- Encourage you to take a COVID test within 24 hours before coming to campus; and
- Ask you to refrain from coming to campus if you receive a positive COVID test result or if you are experiencing any symptoms of COVID-19 (e.g., fever, chills, muscle/body aches, sore throat, new cough, congested or runny nose, fatigue, headache, shortness of breath or difficulty breathing, loss of taste or smell, or any gastrointestinal symptoms).
- All visitors are also expected to report a positive COVID-19 test result or clinician diagnosis to [HUHS via email](mailto:HUHS@huhs.harvard.edu) immediately if they have been on campus within 48 hours of symptom onset or receive a positive COVID-19 test result.

Thank you in advance for your understanding and cooperation with Harvard University’s and HLS’ continuing COVID-19 safety rules and requirements, which remain in place for the health and safety of our community. We are very pleased to be hosting visitors once again and we look forward to welcoming you to our campus!
