Loan Cost Example

The total amount you will pay for this loan will vary depending upon the amount you borrow. This example provides an estimate based upon a loan of \$10,000.

| Repayment Option (while enrolled in school) | Amount Provided (amount provided directly to you or your school) | Interest Rate | Loan Term (how long you have to pay off the loan) | Total Paid over 10 years |
|---|---|---------------|--|--------------------------|
| DEFER PAYMENTS Make no payments while enrolled at least half-time or during the 6 month grace period. | \$10,000 | 8.00% | 10 years Begins after the in-school/grace period ends | \$18,442.80 |

About this example:

- 1) Loan will accrue interest from the date of each disbursement and continue to accrue until the loan has been repaid in full.
- 2) Total Paid=Interest calculated on the loan amount from August of your initial year through the 6 month grace period (this interest will be capitalized at the end of the grace period – added to the principal) plus principal and interest paid during the repayment period.
- 3) Your 6 month grace period begins once your enrollment falls below half-time status. Repayment begins at the end of the grace period.
